Predgovor

Matevž Čelik
MAO, direktor

Oblikovanje ima moč, da spreminja način, kako živimo, kako proizvajamo in uporabljamo dobrine ter kako naseljujemo prostore. BIO je transdisciplinarni laboratorij, učilnica in forum, na katerem se preizkušajo njegove zmožnosti. Zato vas oblikovanje na BIO prestavlja onkraj območja udobja, pred izzive, na katere je treba odgovoriti, in možnosti, ki jih je mogoče izkoristiti. Doživeli ga boste na poteh in izletih, na katere se niste nameravali odpraviti. Našli ga boste na teritorijih in v prostorih, ki jih niste nameravali obiskati. Na BIO boste na oblikovanje naleteli tam, kjer ga niste pričakovali.

Letošnji BIO, z naslovom *Daleč, tako blizu*, se osredotoča na glavni potencial Slovenije: njeno krajino. Kustosinji Angela Rui in Maja Vardjan sta mednarodne skupine oblikovalcev napotili v gozdove, v kraško podzemlje, v rudarske revirje, na panonske ravnice, na obalo in v slovenske Alpe. Projekti, zasnovani in predstavljeni na BIO, poskušajo prepoznati možnosti v krajih, ki so le korak od prestolnice, a so zunaj žarišč aktualnih razprav o prihodnosti. Najzanimivejši del bienala oziroma ključna vsebina razstave, ki sicer stoji v MAO, je torej na ogled v sedmih krajih: Grosuplje, Kočevje, Kobarid, Lendava, Trbovlje, Piran, and Ljubljana.

BIO predstavlja nove modele in strategije za turizem, trženje in predstavitev znamenitosti, pridelavo hrane ter razvoj in rast novih možnih dejavnosti, ki so jih oblikovalci razvili s skupnim raziskovanjem ter sodelovanjem z lokalnimi organizacijami in podjetji. Še pomembnejše pa je, da so s svojim delom na terenu mobilizirali širok krog ljudi in organizacij za sodelovanje pri iskanju priložnosti in udejanjanju sprememb, po katerih kličejo spremenjena demografija, podnebje in ekonomska realnost. Prav v tem se kažejo moč, sposobnost in relevantnost oblikovanja za boljšo skupno prihodnost.

Foreword

Matevž Čelik
Director, MAO

Design has the power to change the way we live, the way we produce and use goods, and the way we inhabit places. BIO is a transdisciplinary lab, a classroom, and a forum where its own powers are tested. This is why at BIO design will push you out of your comfort zone; it will present you with challenges that need to be answered and with possibilities that can be exploited. You will experience it on trails and trips you never meant to take. You will find it in territories and places you never meant to visit. At BIO, you will bump into design wherever you least expect it.

Faraway, So Close, this year's edition of BIO, focuses on Slovenia's main potential: its landscape. Curators Angela Rui and Maja Vardjan have deployed international teams of designers to the woods, the karst underground, mining areas, the plains of the Pannonian Basin, the Slovenian coast, and the Slovenian Alps. The projects designed and presented at BIO seek to identify the potential of places that are only a stone's throw away from the capital, yet are excluded from current discussions on the future. The most interesting part of the biennial and the key content of the exhibition held at the Museum of Architecture and Design is therefore on display in seven venues: Grosuplje, Kočevje, Kobarid, Lendava, Trbovlje, Piran, and Ljubljana.

BIO presents new models and strategies for tourism, for marketing and presenting attractions, for food production, and for the development and growth of possible new activities, all developed by designers through common research and cooperation with local organisations and businesses. More important, however, is the fact that through their fieldwork the designers have managed to mobilize a wider circle of people and organisations to take part in identifying opportunities and implementing changes necessitated by altered demographics, the climate, and economic reality—and this is exactly what reflects the power, ability, and relevance of design for a better common future.

Daleč, tako blizu

Angela Rui in Maja Vardjan

Dobra novica: najnovejše raziskave kažejo, da v Evropi vedno več ljudi zapušča mesta in se naseljuje na podeželju in v drugih neurbanih okoljih. Še več – zdi se, da se ta trend krepi. Toda čeprav je mesto še vedno model, v okviru katerega potekata razprava o sodobni družbi in njena interpretacija, absolutno število ljudi, ki živijo v urbanih centrih, pa se povečuje, najnovejši podatki nakazujejo pomemben premik, ki ga lahko opredelimo kot nov fenomen: izobraženi in emancipirani mladi ljudje, ki so odraščali v urbaniziranem modelu, prenašajo svoje vrednote v druge, anonimne okvire.

Ob upoštevanju geografskih, političnih in gospodarskih značilnosti Slovenije je BIO 25 priložnost za preizkus v uvodu navedene paradigme. Zdi se, da je Slovenija odlično izhodišče za diskusijo o pomenu omenjenega premika in tudi prostor za preizkušanje pojma »daleč« kot še neopredeljenega območja za ponovno raziskovanje.

Daleč, tako blizu raziskuje doslej neznane načine, s katerimi sodobna populacija interpretira in aktivira alter urbano, pri čemer je beseda »alter« povezana tako s pojmom alternativnosti kot tudi s konceptom koeksistence. Medtem ko iščemo nove teritorije, ki bi jim dali pomen, kraje, ki bi jih ponovno naselili, starodavne običaje, ki bi jih obudili, in osnovna sožitja, ki bi jih ponovno osmislili, se iz sobivanja oddaljenih pomenov in sodobnih navad porajajo nova osvobajajoča trenja. Na kolektivni ravni gre za oblikovanje novega skupnega sveta in ustvarjanje globalnega prostora izmenjav.

Obdobje antropocena se je začelo v času, ko razumemo, da razvoj zemlje ni neodvisen od delovanja človeka. Jasno je, da sami proizvajamo svoje bodoče okolje. V kakšnih pogojih si torej želimo živeti?

Teoretična obravnava *alter urbanega* v kontekstu BIO 25 je postala mogoča z

Faraway, So Close

Angela Rui and Maja Vardjan

Good news: recent trends are showing that more and more people in Europe are leaving cities and settling in rural and other non-urban contexts. What's more, this trend appears to be intensifying. Although the city remains the model within which the evolution of contemporary society is discussed and interpreted, and the absolute number of people living in large urban centres continues to increase, recent data point to a significant shift that is framed as a new phenomenon: informed and emancipated young people who have grown up in an urbanized model are taking their values to other anonymous contexts.

Considering the Slovenian geographical, political, and economic aspects, the BIO 25 Biennial is an occasion to test the consequences of this initial paradigm. The country appears to be the perfect foundation for a discussion of the status of this global shift and as a way to test the "faraway" as a yet undefined area to explore once again.

Faraway, So Close investigates the unprecedented ways with which the contemporary population interprets and activates the alter-urban by considering the "alter—" as linked both to the notion of an alternative and to the concept of coexistence.

New liberating frictions could emerge from the cohabitation of remote meanings and contemporary habits in the search for new territories to which we can give meaning, places that can be re-inhabited, where ancient relationships can be re-enacted, basic coexistences re-imagined. At the collective level, it is a matter of inventing a common world and creating a global space for exchange.

The Anthropocene arrives at the moment when we understand that geology is not distinct from human production. It thus becomes clear that we are producing our future environment. In what kind of conditions do we want to live?

The theoretical appropriation of the *alter-urban* within the context of BIO 25

decentralizacijo samega bienala ter tudi z opažanji in odzivi udeležencev.

Sedem multidisciplinarnih skupin, ki jih vodijo mednarodni gostujuči oblikovalci v dialogu s sedmimi slovenskimi strokovnjaki, je dobilo nalogo, da razščejo specifične lokacije, kot so sodobne ruševine, podeželje, jame, gozd, zapuščena industrijska območja, Alpe in Sredozemsko morje, kot platforme za diskusijo o splošnem stanju sodobne družbe.

Vsek projekt se začne s formulacijo zgodbe oziroma *epizode*, v kateri se križata dejanski kontekst in hiperfikcija. Končni cilj je aktiviranje diskurza v zvezi s temi situacijami, postavljanje vprašanj ter odpiranje možnih scenarijev in vizij. Vsaka lokacija je tako postala prostor razprave za teoretična razmišljanja, povezana z oblikovanjem.

Za oblikovalce delo v točno določenem lokalnem kontekstu pomeni priložnost, da skozi načrtovanje procesa odkrijejo svojo identiteto. Tovrstni ekspediciji projekti so vaja za ponovni premislek – ne samo pokrajine, ampak tudi oblikovalske discipline. Skozi ta dialog je osebnost oblikovalca kot sodobnega subjekta uvjeta med potrebo po povezovanju globalnega in specifičnega ter potrebo po kombinirani posameznikove identitete in odpiranju drugemu. BIO 25 je zapustil institucijo muzeja, se decentraliziral prek celotne države ter tako našel druga območja za preizkus svoje učinkovitosti in za doseganje nove publike. Razstava posebjava struktturni okvir bienala in raziskuje oziroma se osredotoča na dve različni kategoriji – lokacije in muzej – ki so ju ekipi obravnavale prek postavitve binarnih instalacij.

Če je bil namen instalacij na samih lokacijah – za katere upamo, da bodo stale dlje časa – vzpostavitev specifičnega dialoga z lokacijo, vključno z občinami, institucijami in prebivalci, pa muzej predstavlja stanje tega specifičnega trenutka v času in njegovo nujnost. Je mesto za oblikovanje širše pripective, ki bo v bližnji prihodnosti brez dvoma ponovno obveljala za oddaljeno. Toda danes je muzej mesto, ki odpira možnosti za spekulacijo, povezano s potrebo po oblikovanju globalnega prostora izmenjav.

has been made possible by the decentralization of the biennial itself and also by the observations and responses of the participants.

Seven multidisciplinary teams, led by international guest designers in dialogue with seven Slovenian professionals, were asked to explore precise locations as contemporary ruins, countryside, caves, forest, post-industrial sites, the Alps and the Mediterranean Sea as platforms from which to launch a discussion about our broader contemporary social condition.

Each project starts with the formulation of a story, the so-called *episode*, where real context and hyper-fiction intersect. The overall goal is to activate a discourse around these situations, formulating questions and opening up possible scenarios and visions. Thus each location became a discursive space for a theoretical and design-related speculation.

For the designers, working in a precise local context provides an opportunity to discover their identity through an itinerary. Expeditionary projects work as a practice for the re-appropriation not only of landscape, but also of the design field. Through this dialogical signification, the figure of the designer as a contemporary subject is caught between the need for connecting the global and the specific, the need for combining individual identity and opening to the other. And each biennial fights its battle on the ground. BIO 25 actually leaves the institution, decentralizing across the whole country, and thus finds a different ground on which to test its efficiency and reach new audiences. The exhibition encapsulates the hardware of the biennial itself, focusing on two different categories to explore – site-specific and museum – both considered by the teams through the design of two binary installations.

If the aim of the on-site installations – which hopefully will endure – was the construction of a specific dialogue with the location, including the respective municipalities, institutions, and inhabitants, the museum represents the state of this specific instant in time and its urgency. It is a place for the construction of a broader narrative that will no doubt be perceived as faraway again as soon as the near future. But today it represents the place that opens possibilities for speculation related to the need to create a global space of exchange.

Sprostitev podzemlja

Grosuplje – Županova jama

V Sloveniji je zaradi posebnih geoloških značilnosti kraškega terena registriranih okoli 11.000 jam. Pod nami je torej ogromna mreža podzemnih dvoran, ki so preživele od davnih časov do današnjih dni in se ne menjijo za spremicanje letnih časov ali za spremembe človekovega okolja. Gledano s širše perspektive podzemlje razumemo kot prostor neznanega in se sprašujemo, katere analogne prostore nam sploh še dopuščajo današnja sodobna okolja oz. kateri prostori nam še ostanejo za sporočanje nezavednega in za razkrivanje naše globoke povezave z materialnostjo in nematerialnostjo narave.

Z oblikovalskega stališča se zdi, da v trenutku, ko se srečamo z naravnim virom, ta zapusti področje geologije in vstopi na področje človeškega. Takrat se znajdemo na križišču, kjer se podzemlje lahko »sprosti« oz. osvobodi različnih pojmovanj. Na tej predpostavki sta Studio Formafantasma in skupina oblikovalcev oblikovala dva scenarija, ki se odvijata v podzemnih prostorih kraškega terena: v kamnolomu, ki ga je ustvaril človek (kamnolom Lipica), in v jami, ki jo je ustvarila narava (Županova jama).

V kamnolому človek izkopava material in ga prinaša v naše racionalno grajeno okolje, jama pa ostane v domeni narave – neosvetljen ekosistem, kjer vladajo občutki, intuicija in celo kaos. Celoten projekt, ki ga je navdihnilo sodelovanje s teoretičnim fizikom in filozofom Andrejem Detelo, raziskuje napetost med dinamiko sintropije in entropije ter temelji na materialnosti podzemlja. Razdeljen je na dva sklopa, ki uporabljata jezik teh dveh nasprotnih si realnosti.

Prvi del, instalacija v Muzeju za arhitekturo in oblikovanje, je zasnovan kot prostor sistemov, časa in razuma, govor o sprostitvi kot o »ekstrakciji« oziroma trenutku, ko naravni material postane cenjen, spremenjen in uporabljan s strani ljudi. Čeprav se čas, ki je potreben za izdelavo predmetov, od začetka

Underground Release

Grosuplje – Mayor's Cave

Because of the special geological features of Slovenia's Karst terrain, approximately eleven thousand caves are officially registered in the country. A huge underground network of chambers exists just beneath our footsteps, unchanged since time immemorial, indifferent to the passing seasons, and the mutations of our human environment. This subterranean world has long been perceived as a place of the unknown, causing us to ask what analogous spaces the contemporary environment has sacrificed, and what places remain that speak to the unconsciousness, revealing our deepest relationship to the materiality and immateriality of nature.

From the perspective of design, a natural resource leaves the purely geological realm and enters the human one the moment we encounter it. At that instance, we face a crossroads where the underground world can be "released" from various perspectives. Addressing such a place and the issues it raises, Studio Formafantasma and its associated team identified two scenarios, both of them set in underground Karst spaces: the Lipica Quarry which is man-made, and Županova Jama (Mayor's Cave) which is naturally-formed.

Man unearths material from the quarry and brings it above ground into our rationally constructed environment, while the cave remains in the domain of nature, an unexposed ecosystem, a space where emotion, intuition, and even chaos rule. The episode, inspired by an exchange with theoretical physicist and philosopher Andrej Detela, explores the tension between the dynamic of syntropy and entropy, driven by the materiality of the underground, and narrated by the two strands of the project using the languages of two inverted realities.

In the first reality, represented in an installation in MAO as a space of systems, time, and rationale, release is

Vhod v Županova jamo, 1927,
zasebni arhiv Damjana Virška

Entrance to Mayor's Cave, 1927,
courtesy of Damjan Viršek

industrializacije neprestano skrajšuje, pa je čas, ki je potreben za nastanek materiala v naravi, še vedno enak. Kaj pa, če bi čas proizvodnje razširili tako, da bi vključeval tudi nastanek surovin? To bi nam omogočilo, da bi naše predmete doživelji tudi iz perspektive zapletenih geoloških formacij in prek časovnega obdobja, ki močno presega človeško življenje.

V drugem delu projekta pa je sprostitev prikazana kot >potopitev< oziroma trenutek, ko narava človeka prevzame in ga zapelje, človek pa se prepusti njeni moći. Z lokacijo v Županovi jami poskuša instalacija prikazati podzemlje kot prostor subracionalnih odzivov na kamnino, prostor, kjer so čustva, eksperimentiranje in kaos gonilo naših raziskav tega materiala. Osrednja misel epizode je povzeta s komunikacijo med temu nasprotnima svetovoma.

about "extraction" – the instant when a natural material becomes valued, transformed, and utilized by human beings. Although the time needed to produce objects has continued to diminish since industrialization, the time needed for material to emerge in nature remains the same. What would happen if we extended our definition of the time of production to include the time needed for raw materials to form? This would allow us to perceive objects as emerging from more complex geological formations and thus as part of a timeline that transcends the human timeline.

In the second reality, the release is about "infusion" – the instant when man is overwhelmed and seduced by nature, released into its power. Located in Županova Jama, this installation makes use of the underground as a space for sub-rational reactions where emotion, experimentation, and chaos propel our investigation into the material. The central issue of the episode is communication between these two inverted worlds.

Zavzetje gozdov

Kočevje – Rožni studenec

62 % slovenskega ozemlja pokrivajo gozdovi in pričakovati je, da bo ta odstotek še naraščal. Pred kratkim sprejeti program gospodarskega razvoja države se osredotoča na varstvo in inovativno uporabo naravnih virov. Ti programi so se hitro odzvali na gospodarsko krizo, ki je povzročila propad lesnopredelovalne industrije, vključno s tovarnami pohištva, pa tudi povečanje opuščenih poljedelskih površin na bolj oddaljenih podeželskih območjih. Objektivno gledano se je prostor vrnil k naravi.

Ta položaj je hkrati priložnost za razmišljjanje o enem od odprtih vprašanj, povezanih s pojmom modernosti. Iz današnje širše perspektive se zdi, da je oblikovanje podedovalo napačno razmišljjanje, da naša kultura izhaja iz industrijske revolucije, ki jo opisujejo kot dogodek, sposoben izoblikovanja nove družbe, gospodarstva in jezika. Vse, kar se je zgodilo prej, v dolgem procesu nastajanja človeške civilizacije, je zavrnjeno kot neuporaben dodatek k sedanosti in predvsem k prihodnosti.

Tema epizode *Zavzetje gozdov* je morebiten obrat tega pogleda: bi lahko danes oblikovali družbeno okolje po vzoru eksperimentalnih komun z začetka 20. stoletja ter se tako izognili racionalizaciji in standardizaciji »sodobnega« življenja? Lahko v današnjem času oblikujemo nove pomembne platforme za nadaljnji razvoj človeštva in družbenega življenja?

Na podlagi francoskih vizionarskih projektov, kot jih predlagajo utopični socialist Martin Buber, veganska anarchistka Sophia Zaikowska, libertarna pacifistka in učiteljica Madeleine Vernet ter politični teoretik in socialni inovator Jean-Baptiste André Godin, je nastal predlog za oblikovanje kolektivne bivanske strukture globoko v gozdu kot prostora, kjer si bodo vsi enaki.

Instalacija je postavljena na območju Kočevja in sestoji iz platforme, ki je

Occupying Woods

Kočevje – Rožni studenec

Forests cover sixty two percent of Slovenian territory and this is expected to increase in the future. Recent economic development programmes focus on the protection and innovative use of natural resources. These programmes have quickly taken into account the effects of the economic crisis that has seen the failure of many wood-based industries – including furniture companies – as well as the increase of abandoned farmland in the more remote parts of the countryside. From an objective perspective, this space is being returned to nature.

This situation has provided an opportunity to speculate about open questions related to the notion of modernity. From a broader and more contemporary perspective, design inherited the mistaken belief that our culture originates from the Industrial Revolution, long interpreted as a historical development that had the power to generate a new society, economy, and language. Everything that happened during the long process of human civilization before the Industrial Revolution is dismissed as a useless footnote to the present and, more importantly, the future.

The *Occupying Woods* episode proposes a possible change in perspective: is it possible to imagine and re-enact today the social norms that formed the model of experimental communities developed at the beginning of the 20th century, and thus escape from the rationalization and standardization of so-called modern life? Are we capable of designing new and vital platforms for further human and social development?

The French designer, Matali Crasset, inspired by French visionary enterprises such as those created by the utopian socialist Martin Buber, the vegan anarchist Sophia Zaikowska, the libertarian pacifist and teacher Madeleine Vernet, and the political theorist and social innovator Jean-Baptiste André Godin, proposes

Gasilska veselica mahovniških gasilcev pri Rožnem studencu, 1973,

pravzaprav reinterpretacija tradicionalne keramične peći, elementa, ki pomeni jedro domačnosti, hkrati pa je »prostor«, ob katerem se je razvila prva osnovna oblika skupnosti – družina. S postavitvijo »naprave« v središče gozda se ta spremeni v domač prostor, ki s toploto privablja lokalne prebivalce in obiskovalce.

Serija projektov, predstavljenih na razstavi v muzeju, aktivira razumevanje gozda skozi različne pristope in poglede: od digitalizacije žive materije do orodij za nabiranje rastlin in lovљenje živali v gozdu, od dokumentiranja mnenj lokalnih prebivalcev do raziskovanja mej, ki ločujejo civilizacijo in naravo – z binarnega vidika, ki vključuje tudi glas samega gozda kot živega bitja.

a collective living structure built in the heart of the forest, a community where everyone would regard each other as equal.

The installation, located in the Kočevje region, is comprised of a platform that is a reinterpretation of a traditional ceramic stove, an element that represents the core of domesticity, the “place” around which the first basic form of community – the family – evolved. By placing the device in the heart of the woods, the forest itself becomes the domestic place, the warm hearth, that will be re-inhabited by local people and visitors who in turn contribute their own warmth.

A series of related projects individually designed by the members of the team and presented in the MAO exhibition encourage the interpretation of the forest at many different levels and from a variety of perspectives: from the digitalization of living matter to the tools for gathering life in the forest, from the documentation of the voices of local inhabitants to the degree to which civilization and nature have become separated: a binary point of view that includes the voice of the forest itself as a living being.

Po utopiji

Trbovlje – Paviljon ob Delavskem domu

Pojem utopije je neločljivo povezan z idejo boljše družbe, z iznajdbo kolektivne želje, ki je potisnjena kar najblžje območju realnosti. V primeru nekdanje Jugoslavije so utopične vizije do neke mere postale resničnost: ideja radikalno drugačnega sveta je omogočila ustanovitev nove države oziroma novega družbenega subjekta v obliki socialistične družbene ureditve.

Procesi modernizacije so preoblikovali grajeno okolje in družbo kot tako, in z neprimerljivo mešanico utopije in pragmatizma je država izkoristila skupnost za oblikovanje te kolektivne želje. Pojem samoupravljanja oziroma samoupravne družbe, ki jo vodi delavski razred, je bil gonilo razvoja urbanih in podeželskih območij, kot so na primer Trbovlje, ki jih je ekipa pod vodstvom arhitektov studia Point Supreme vzela za izhodišče svojega projekta. Trbovlje, ujeté v dolini, obkroženi s hribi, so mesto, ki je bilo zaradi svoje rudarske tradicije središče ene prvih industrializiranih regij v Sloveniji, pomen pa je pridobilo tudi zaradi svojih nenehnih prizadovanj za naprednejši, sodobnejši način življenja.

S propadom Jugoslavije je prišlo do vdora novih ideologij kapitalizma in privatizacije, ki so povzročile propad industrijskega modela tovarne kot produktivne platforme udobnega življenja in družbene učinkovitosti. Rudniki so se zaprli ter za sabo pustili ogromno industrijske infrastrukture in visoko nezaposlenost, nostalgija pa je, razumljivo, postala nova bolezen družbe. Kako se lahko oblikovanje danes, ko smiselnih utopičnih idej ni več, brez naivnega optimizma naveže na trenutke iz preteklosti, ki imajo utopični pomen?

Namesto da bi epizoda *Po utopiji* predstavlja idealno vizijo prihodnosti, se ukvarja z raziskovanjem sedanosti, s skritimi realnostmi postindustrijskega mesta. Steklen paviljon Tiny, ki sta ga oblikovala arhitekti in je postavljen v središču Trbovelj, je postal oder za tako

After Utopia

Trbovlje – Pavillion next to Workers Cultural Centre

Utopia is connected to the idea of a potential perfect society as well as to the invention of collective desire pushed as close as possible to the realm of reality. In the case of the first definition, Yugoslav visions of utopia entered the domain of the real: the will toward a radically different world made possible the creation of a new state and a new social subject, put into effect by the realization of the socialist society.

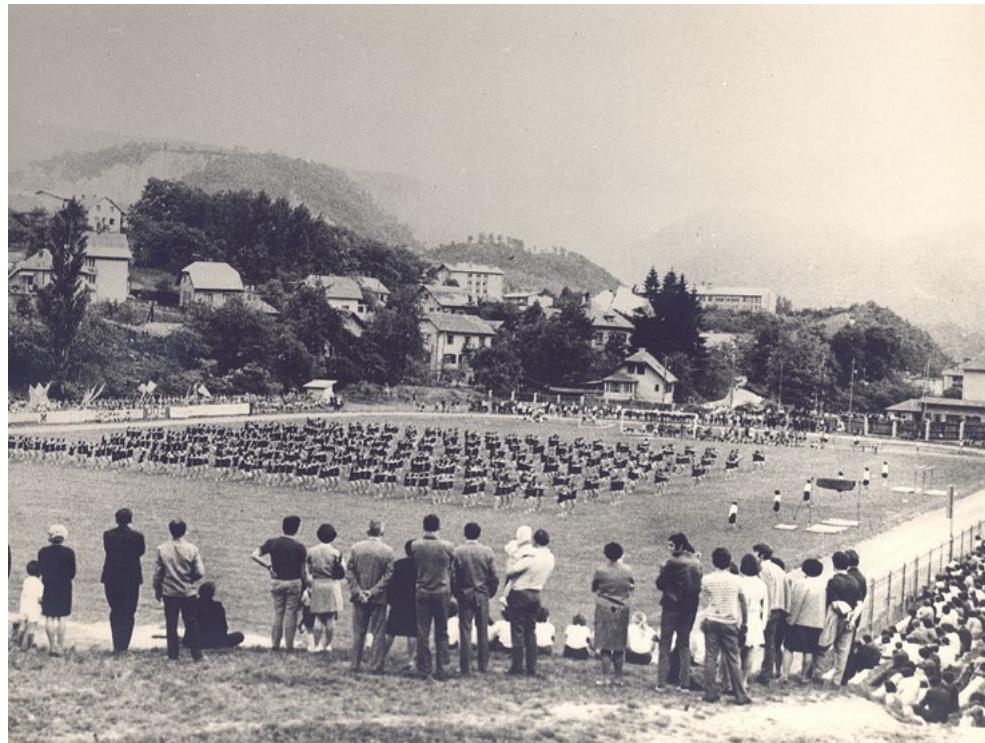

At the same time, the process of modernization transformed the constructed environment and society at large. The state, through a blend of utopia and pragmatism, also constructed the common desire of the community. Finally, the concept of self-management and a self-regulated society led by the working class became the engine of the development of urban and rural territories in Yugoslavia, among them Trbovlje – the town that provides the case study for the team led by Point Supreme architects. Nestled in a valley surrounded by mountains, Trbovlje, with its coal mining tradition, was one of the first industrialized regions in Slovenia, and it earned a reputation for its ongoing struggle to create a more progressive and modern way of life.

The collapse of Yugoslavia and the rise of the ideologies of capitalism and privatization caused the collapse of the industrial model of the factory as a productive platform for wellbeing and social efficiency. Mines closed, leaving behind massive industrial infrastructure, high levels of unemployment, and nostalgia understandably became a social disease. In the absence of any meaningful utopian ideas today, how can design access instances from the past that carry meaning while also avoiding naïve optimism?

Instead of imagining an ideal vision for the future, the episode *After Utopia* examines the present and the hidden

imenovano »super normalno propagando«, njegov namen pa je razkriti izbrane zgodbe Trbovelj v zvezi s prebivalci mesta, njihovimi imaginarnimi realnostmi, fantazijami, ustvarjalnimi obsesijami in neustrašnimi značaji. Njihovo edinstveno razkritje je odgovor na premik od socializma k današnjemu času; pomanjkanje kolektivne dimenzije je luknja, v kateri so se ljudje izgubili, orkestracija zbirke zgodb posameznih osebnosti pa je točka, na kateri se ljudje lahko ponovno srečajo.

Instalacija v Muzeju za arhitekturo in oblikovanje povzame in podkrepi vrednost teh osebnih zgodb, katerih pomen je dodatno poudarjen s serijo elementov in medijev, zaradi oblikovanja razstavnega prostora pa ponovno daje občutek skupnih sanj.

realities of the post-industrial town of Trbovlje. The TINY glass pavilion designed by the architects and placed in the centre of Trbovlje becomes a stage for so-called "Super Normal Propaganda", meant to reveal selected stories about citizens of Trbovlje, their imaginative realities, fantasies, creative obsessions, and courageous attitudes. This unique installation records and responds to the shift from socialism to the present time. The lack of a shared dimension is the gap in which people got lost, and the orchestration of a collective of singular personalities becomes the point where people can meet again.

The installation at MAO gathers and amplifies the value of these personal stories, and deepens them with a series of parallel elements and media. The design of the room creates the sensation of a common dream once again.

Čisto novo sobivanje

Ljubljana — Muzej za arhitekturo
in oblikovanje

Posledica gospodarske krize leta 2007 v Sloveniji, pa tudi v večini evropskih držav, so opuščena gradbišča na urbanih in podeželskih območjih: znašla so se v nekakšnem pat položaju, ki ne dopušča sprememb njihove namembnosti in njihove uporabe za programe, razvite s strani lokalnih skupnosti ali države. Kako lahko propad političnih in ekonomskeh sistemov spremeni »zapuščeno« v dimenzijo, ki ni podvržena učinkovitosti in specializaciji?

Soočen s temo epizode *Cisto novo sobivanje* je Didier Fiuga Faustino v središče svojega projekta *Exploring Dead Buildings 3.0* postavil kiosk K67, in sicer v njegovem stanju moderne arhitekturne ruševine v Ljubljani, ter ga določil za začetno točko svojega sporočila. Kiosk K67, ki ga je leta 1966 oblikoval slovenski arhitekt in oblikovalec Saša J. Mächtig, je v svoji zgodovini naseljeval številna evropska mesta, kjer so ga uporabljali za izvajanje različnih javnih in zlahka dostopnih storitev. Toda namen nekega izdelka je vedno arbitraрен in ni določen s časom in prostorom. Danes se kiosk K67 pojavlja kot oblikovalska ikona 20. stoletja, kot zanemarjen in zapuščen objekt v mnogih mestih vzhodne Evrope, kot nostalgičen spomin na socializem ter kot živ organizem, zmožen nenehne regeneracije skozi nove funkcije in mutacije. Hkrati pa se je spremenil v odvečen element, ki priča o propadu ravno tiste preteklosti, za katero je bil oblikovan.

S tem ko je avtor v središče svojega projekta postavil kioske, je želel ponovno izraziti svoj dvom o povezavi med posameznikom in družbo v današnjem času. Kot poklon projektu *Splitting* Gordona Matta-Clarka (1974) je kiosk K67 kirurško razrezal, da ga je nato lahko skrčil. Ta akt manipulacije spremeni K67 v trofejo preteklosti, iz objekta uporabe se prelevi v objekt spomina. Krhki novonastali objekt, ki nima namena ali točno določene funkcije, simbolizira destrukcijo kolektivnega interesa in nastanek

Brand New Coexistence

Ljubljana — Museum of Architecture
and Design

Since the 2007 economic crisis, Slovenia, like most European countries, has been dealing with the presence of abandoned construction sites in urban and rural areas. These sites are trapped in the now well-known stalemate that doesn't allow for the renegotiation of their meaning or for their use through alternative programmes developed by local municipalities or national governments. How can failed political and economic systems transform what has been abandoned into a dimension of liberation from efficiency and specialization?

In the episode *Brand New Coexistence*, and specifically *Exploring Dead Buildings 3.0*, the designer Didier Fiuga Faustino interprets the K67 Kiosk as an architectural modern ruin and as the starting point for the main discourse. Designed in 1966 by the Slovenian architect and designer Saša J. Mächtig, the K67 – easily visible and accessible – inhabited the cityscape and provided different services not only in Ljubljana but also in other cities across Eastern Europe. But the purpose of an object is always arbitrary, not fixed in time and space. Today, K67 is both a design icon of the 20th century and a derelict and abandoned object scattered throughout these cities. It is a nostalgic reminder of socialism, and a living organism capable of perpetual regeneration through new functions and vernacular mutations. But it has also turned into an obsolete element, reflecting the failure of the precise past for which it was designed.

The author addressed the main theme by creating a project that focuses on the kiosks in order to question the current relationship between the individual and society. As a tribute to *Splitting*, the performance act by Gordon Matta-Clark (1974), the iconic K67 Kiosk is surgically cut in order to shrink its size. This act of manipulation turns K67 into a trophy of the past, its purpose shifting from function to memory. The new and more fragile

Kiosk K67, reporterske kabine, bežigradski stadion, Ljubljana,

Museum of Architecture and Design, Ljubljana

individualnega. Kiosk postane popačena ikona, popačen odsev naše sodobne družbe.

Celoten performans je pravzaprav izjava o stanju oblikovanja danes: z manipulacijo postanejo kioski, postavljeni na dvorišču Muzeja za arhitekturo in oblikovanje, izraz ogorčenja nad večno nostalgijo, ki preveva modernistično in racionalno oblikovanje, medtem ko v razstavnem prostoru muzeja prikazana zbirka fragmentov, pridobljenih v procesu razgaljanja originalnih kioskov, poudarja našo manijo v zvezi z detajli in oblikami kot relikvijami.

Kot del epizode je v muzejski knjigarni na ogled tudi decentralizirana »živa« naprava, imenovana *interpassivni stroj*, ki jo je oblikovala skupina oblikovalcev vzporedno s Faustinovo intervencijo. Ta manipulira z informacijami o kiosku K67 ter proizvaja gradivo, ki reflektira parazitski obstoj kioskov v ruševinah, ki jih naseljujejo in hkrati spreminja.

object, which has no purpose or precise function, symbolizes the destruction of the collective interest and its replacement with the individual one. It becomes a distorted icon: namely, a reflection of our distorted modern society.

The entire performance is a statement on design today. By manipulating the kiosks and positioning them in the courtyard of MAO, they become an outrage to the eternal nostalgia for modern and rational design, while inside the museum the collection of fragments obtained by the stripping of the original kiosks emphasizes our mania for details and shapes within the general concept of the reliquary.

As part of the episode, a decentralized "living" device – *The Interpassive Machine*, designed by a team associated with Didier Fiúza Faustino – is placed inside the bookshop, hacking information on K67 in the shape of collectable materials that reflects the parasitic lives of the kiosks, thus occupying the ruins and transforming them.

Nov zagon podeželja

Lendava — Genterovci

V splošni zavesti je podeželje še vedno tisto, kar ima mesto za svoje nasprotje in kar šteje za velik odprt prostor, kjer so vrednote, tradicije in pristna občutja izoblikovali občutek življenja v harmoniji z naravnim okoljem in zakoni narave. Izraz *campus* izvira iz latinske besede za polje in označuje odprt prostor namenjen različnim človekovim dejavnostim; to je hkrati tudi prva definicija urejene narave oziroma podeželja.

Če je bil *campus* v preteklosti zaznamovan z lokalnimi rituumi in kmetovanjem, ki je izhajalo iz osebnega odnosa do zemlje, narave in živali, je današnje podeželje visoko mehanizirano območje, ki je vedno bolj avtomatizirano, digitalizirano in specializirano – zaradi vse večjih zahtev po učinkovitosti v poljedelstvu in tudi v prehranski industriji. Ta razvoj se odraža v ekstremnem nadzorovanju izkoriščane, udomačene pokrajine, hkrati pa podeželje, paradoksalno, ni več intenzivno delovno okolje za ljudi. Človekova prisotnost tu danes izraža predvsem v obliki razpršenih prostočasnih aktivnosti, ki se odvijajo ob oddaljenih zvokih industrijske in cestne infrastrukture. Podeželje tako postane neke vrste »neprostor«, nedoločljivo področje, kjer identiteta in zgodovinski pomen hitro izginja.

Kolektivni projekt *Nov zagon podeželja* pod vodstvom studia Mischer' Traxler v sodelovanju z raziskovalcem hrane Klemnom Koširjem brez nostalgijskih in romantičnih hrepenenj po izgubljenih običajih odgovarja tej hiperealnosti, povezani z današnjim podeželjem, ki jo razgalja zbirka intervencij skupine oblikovalcev. Okolica vasi Genterovci v bližini Lendave je začasno spremenjena v območje znanja, prostor zavedanja in kritike, in štiri kilometre dolgo nadrealistično pot spoznavanja procesov proizvodnje in porabe hrane, ki jih udeleženci doživijo prek hoje, nabiranja hrane in njenega uživanja. Fizične

Countryside Reloaded

Lendava — Genterovci

The countryside is commonly perceived as a "memento" through which the city remembers and considers its counterpart: nature, the great outdoors where values, traditions, and honest principles once shaped a feeling of life in harmony with the natural environment and its rules. The word *campus*, identified as an open space used for diverse activities, one of the first iterations of regulated nature, derives from the word field, or expanse surrounded by woods: in other words, the countryside.

If in the past the countryside was informed by highly ritualized localism and farming arising from a personal relationship with the land, nature, and animals; today it has become a highly mechanized territory where automation, digitalization, and specialization is driven by the increasing demands for efficiency in agriculture and the food industry. These developments are reflected in the extreme control of the domesticated and even consumed landscape, while paradoxically the countryside has ceased being a labour-intensive place.

There is still a human presence but it is found in scattered leisure activities taking place within distant soundscapes of the industrial and road infrastructure. The countryside thus becomes a kind of non-place, an undefined space in which identity and historical meaning are quickly fading away.

Beyond nostalgia and romantic longing for lost traditions, the *Countryside Reloaded* collective project led by the Mischer' Traxler Studio, collaborating with the food researcher Klemen Košir, refers to the manifestation of a hyper-reality related to a constructed countryside illuminated by the designers' interventions. The surroundings of the Genterovci village in the Lendava region of Slovenia has been temporarily transformed into a land of knowledge, a space of awareness and criticism, where food production, consumption,

intervencije ob poti omogočajo doživetje nekakšne obogatene resničnosti in razgaljajo umeštvo dimenzijske narave: poudarjeni usmerjevalni elementi kažejo na togo geometrijo pokrajine, njive s 3D informacijskimi grafikami prikazujejo podatke o proizvodnji in porabi hrane, naprave za žetje pa ponazarjajo avtonomijo strojev, ki nadomeščajo človeško delo. Začetna in končna točka poti je prazen supermarket, ki je bil nekoč model porabe hrane na osnovi lokalne izmenjave, sedaj pa je spremenjen v začasen prostor socialne izmenjave, ki jo omogoča izkušnja hrane.

Namen vseh komponent projekta je izzivati obiskovalčeve percepcije podeželja skozi različne pristope, ki so pozorno izbrani in predstavljeni tudi na razstavi v muzeju.

and information are experienced along a 4 km surrealist tour that offers not only walking, but also foraging and eating. Physical interventions along the path function as a live experience of augmented reality exposing the artificial dimension of nature: highlighted navigation elements emphasize the rigid geometry of the land, food fields with 3D infographics feature data related to food production and consumption, and harvesting devices showcase the autonomy of the machines that have replaced human labour. The empty supermarket, as the starting and ending point of the food tour, has replaced the model of acquiring food from local exchanges, and is now transformed into a fleeting place for social exchange conveyed by the experience of food.

Through these varied approaches, each component of the episode, sensitively revisited and staged in the current exhibition, challenges the viewers' perception of the countryside.

Nov zagon podeželja

Projekt *Ljudje kot začasni obiskovalci konstruiranega podeželja* je področje okoli naselja Genterovci napolnil s predmeti, instalacijami in izkušnjami, ki spodbujajo razmislek o sodobnem podeželju. Približno štiri kilometre dolga pot se začne v bližini glavnega krožišča in zapuščenega supermarketa v Genterovcih. Obiskovalce vabi, da se sprehodijo čez polja in skozi manjši gozd, kjer lahko ob poti odkrijejo več projektov.

Začetek in konec poti je pri supermarketu (1), ki je tudi prizorišče občasnih delavnic Regratovi izleti pod vodstvom raziskovalca hrane Klemna Koširja. V stavbi lahko obiskovalci vidijo postavitev začasne restavracije ter nekatere kostume in orodja, ki se uporabljajo med Regratovo parado (1). Zraven je tudi delovna soba projekta Pražna hiša (1), kjer se materiali, nabrani pri ruševinah zapuščene podeželske stavbe, spreminjajo v krožnike in posodo za začasno restavracijo. Supermarket je odprt samo v času Regratovih izletov.

Pot se prične na drugi strani ceste. Rožnati elementi poudarjajo grajeno naravo podeželja in obiskovalce usmerjajo; pot vodi mimo dveh različnih naprav za žetev, ki sta del serije Avtonomno kmetijstvo (5, 7). Napravi simbolično ponazarjata obseg avtomatizacije v sistemu proizvodnje hrane danes in jutri. Veliki barvni elementi ob poti ponazarjajo polja hrane (2, 3, 4, 6) in jih lahko beremo kot 3D informacijske grafike, ki pojasnjujejo našo rabo zemlje in porabo vode za pridelovanje hrane. Vse komponente projekta obravnavajo različna vprašanja, težave in možnosti podeželja ter nas želijo spodbuditi k drugačnemu razmišljanju o njem.

Countryside Reloaded

The project *Humans as Temporary Visitors in the Constructed Countryside* fills the area around Genterovci with objects, installations, and experiences that reflect on the contemporary countryside. A trail about four kilometres long starts close to the main roundabout and an abandoned supermarket in Genterovci. Visitors are invited to wander through fields and a small forest to discover several projects along their way.

The start and finish is the supermarket (1): it forms the base for the occasional Dandelion Food Tour workshop guided by food researcher Klemen Košir. Inside, visitors can see the setup of a temporary restaurant and some costumes and tools that are used during the Dandelion Parade (1). There is also the workroom of the Empty House (1) project, where the remains of an abandoned rural building are turned into plates and dishes for the pop-up restaurant. The supermarket is open only during the Dandelion Food Tours.

The trail starts on the other side of the street. Pink elements emphasize the constructed nature of the countryside and help visitors find their way. Along the trail, visitors pass two different kinds of harvesting devices presenting the Autonomous Agriculture (5, 7) series. They question the extent of automatization in food production today, as well as in the future. The large colourful measures along the path are food-fields (2, 3, 4, 6), which can be read like three-dimensional infographics to explain the land and water used for growing food. All of the components of the project tackle various issues, problems, and opportunities for the countryside and seek to challenge our perception of it.

Prožnost Preteklosti

Kobarid

Izraz prožnost izhaja iz naravoslovja in je eden glavnih pojmov v ekologiji. Ob predpostavki, da ima prav ta izraz ključno vlogo pri raziskovanju te epizode, je ekipa pod vodstvom Studia Folder raziskovala njegove različne pomene, in sicer v povezavi z dogodki, ki so oblikovali pokrajino in zgodovino Posočja med prvo svetovno vojno.

Projekt, kot so ga zastavili oblikovalci, preučuje tok zgodovine, hkrati pa izziva pojem preteklosti v širšem pomenu in v daljšem časovnem obdobju. Vezna točka med pojmom prožnosti in sledmi časa je zemlja, ki pomeni osrednjo temo, iz katere lahko izpeljemo različne interpretacije njene vrednosti. Kako lahko predstavimo kompleksnost vrednosti zemlje, ne da bi zašli v posloševanje osnovnega nasprotja med njenim izkoriščanjem in njenim varovanjem?

Projekt je razdeljen na tri poglavja in raziskuje vojaške strategije, varstvo narave in geomantiko kot stališča, ki jih je pri obravnavanju zemlje treba upoštevati. Vsako poglavje je odziv na točno določene trenutke v času, skozi katere lahko opazujemo arbitrarno in spekulativno rabo zemlje.

Prvo poglavje raziskuje vojaški in politični pristop, in sicer prek eksperimentalnih načinov kartiranja območja soške fronte, še posebej tistih, ki so prispevali k razumevanju pokrajine kot geometrijskega polja, kjer so sovražnikove položaje določali s pomočjo fonotelemetričnih sistemov, s katerimi so premagovali omejitve vidnega polja. Projekt tako s pomočjo uporabne znanosti, kot je matematika, raziskuje različne indeksne modele, ki so bili ustvarjeni v 20. stoletju, da bi prispevali k razumevanju naravnih mehanizmov ekosistemov ter medsebojnih vplivov med populacijo, viri in napredkom.

Naslednje poglavje obravnava tematiko varstva narave, saj Slovenija na področju okoljske zakonodaje pomeni avantgardo. Po drugi strani pa se z globalne perspektive

Resilience of the Past

Kobarid

The term resilience originates in the natural sciences and constitutes one of the defining concepts of ecology. Assuming the term as a key role in this episode, the team led by Studio Folder investigates the different meanings of the term by researching the events that shaped the landscape and legacy of the Soča Valley during World War I.

The designers examine the unfolding of history, challenging the notion of the past in broader terms and on a more extended timescale. The conjunction point between the notion of resilience and traces of time exists in the *land* itself, which becomes the pivotal stage from which different interpretations about its value can be extracted. How can we represent the complexity of the land's values without oversimplifying them into the mere opposition between exploitation and preservation?

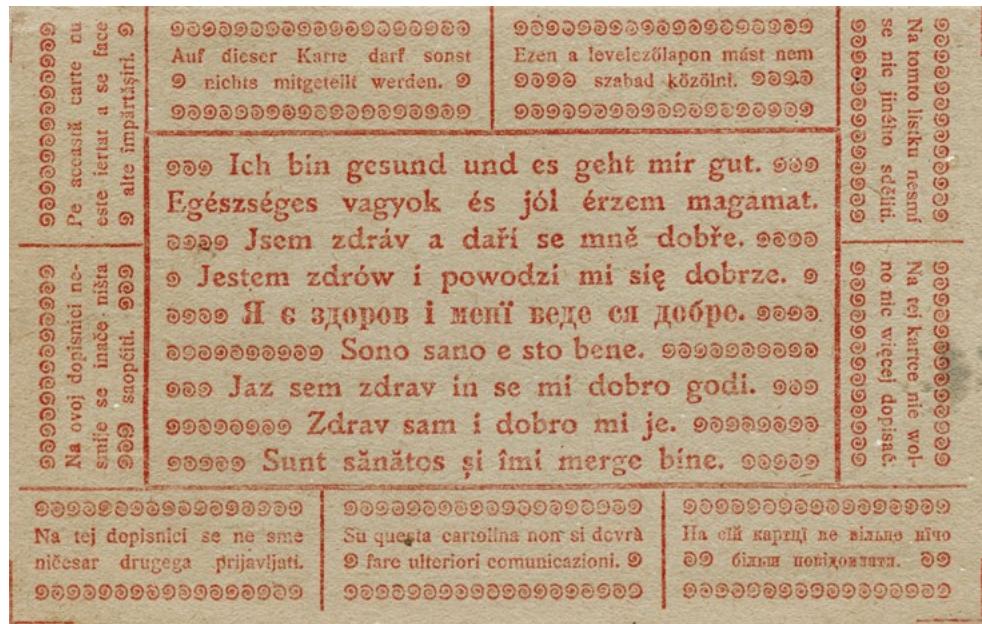

Divided into three chapters, the project represents military strategies, preservation, and geomancy as specific attitudes toward the land. Each of these approaches respond to specific moments in time, and the arbitrary and speculative use of the land is observed through these specific lenses.

The military and political approach is presented through research into experimental methods of mapping the territory of the Isonzo Front, in particular methods that contributed to the understanding of landscape as a geometrical field where the enemy's positions could be located through phono-telemetric systems, thus overcoming the limitation of sight. The project explores the use of applied sciences as mathematics, and various other indices and models created during the 20th century in order to enhance our understanding of the natural mechanisms within various ecosystems, and finally the interplay between population, resources, and progress.

The second approach is presented

Dopisnica z napisom »Zdrav sem in dobro mi jek«

soočamo z resnimi grožnjami za okolje, ki so posledica odločitev vlad. Kako lahko danes zemljo izvzamemo iz političnega diskurza in s tem ohranimo njeno osnovno vrednost?

Zadnje poglavje, ki je mišljeno kot fenomen zunaj političnega in ekonomskega vpliva, se ukvarja z geomantiko in na okolje, pokrajino in teritorij gleda s kar najbolj nekvantitativnega stališča.

Prožnost preteklosti sestavlja dve intervenciji: plavajoča kovinska plošča v Muzeju za arhitekturo in oblikovanje služi kot umetna pokrajina za teoretično in zgodovinsko pripoved, ki prepleta različne dokumente in medije, instalacija v okolici Kobarida, v bližini bojišč soške fronte, pa je okoljski senzor oziroma zvočno občutljiv stroj, ki zaznava in snema zvočno ozadje območja. Arhiv zvokov bo preveden v fizično obliko, ki bo vizualizirala spektralne informacije v avdio datotekah.

through the topic of preservation. Although Slovenia is at the avant-garde of environmental legislation, we nevertheless face serious threats to the environment from the global world that the local governments themselves cannot control. How can we preserve the essential value of the land and take it out of the political discourse?

The third section reflects a phenomenon that exists outside of both the political and economical domains. It presents geomancy as a way of interpreting the environment, landscape, and territory through the most unquantifiable of methods.

Resilience of the Past consists of two interventions. The first is a floating metal surface exhibited at MAO which functions as an artificial landscape for a theoretical and historical narrative, and weaves together different documents and media. While the installation in the Soča Valley, close to the battlefields of World War I, is an environmental sensor: a sound-sensing machine that detects and records the soundscape of the area. The resulting archive of sounds will be translated into a physical output that will visualize the spectral information contained in the audio files.

Novi heroji

Piran – Razstavišče Monfort

Generični lik junaka je neločljivo povezan z njegovimi (ali njenimi) dejanji. V večini primerov se ta dejanja nanašajo na razseljenost; na epska potovanja, ki se začnejo v ljubem kraju, simboli junakove identitete, časti in domovine, in se nato odvijajo v neraziskanih, pogosto sovražnih in pustih deželah, v katerih je predvsem veliko neznanega.

V luči trenutnih globalnih problemov, s katerimi se sooča človeštvo, se zdi, da bi lik klasičnega heroja lahko povezal z likom migranta. Toda če tradicionalni način potovanja, kot ga poznamo iz literature, predvideva zaprtje kroga potovanja, ko se heroj vrne domov in se, bogatejši za izkušnjo zmage, ponovno združi z domačimi, ima danes to potovanje bolj videz ravne črte, ki vodi od ene točke do druge, za seboj pa pogosto ne pušča resničnega doma. Ta tranzicija je postala fizični prostor razseljenosti, na katerega sta se odzvala industrijski oblikovalec Odo Fioravanti in morski veslač Marin Medak.

Ob krutem dejstvu, da je od leta 2015 število migrantov, ki so prispeli na obale Evrope, doseglo skoraj dva milijona, se je ekipa epizode *Novi heroji* ukvarjala s kompleksno temo migracij v trenutni politični klimi, s posebnim poudarkom na migracijah v Evropi in na območju Sredozemlja. Kaj lahko industrijsko oblikovanje, ki temelji na nenehnih ekonomskeih izmenjavah, resnično prispeva k tako občutljivi temi, kot so migracije? S tem ko se projekt osredotoča na junake in njihova orodja za preživetje, se razkrije nezmožnost oblikovanja, da se sooči s tematiko migrantov brez aktivne vključenosti mednarodne politike in ekonomskih načrtov. Toda če so heroje grške in rimske mitologije določala njihova kopja, ščiti, sulice in loki, kateri bi bili tisti fizični predmeti, ki jih bodo kot dokaz migrantove hrabrosti nasledile prihodnje generacije?

Projekt *Aphaestus*, ki je prikazan v Muzeju za arhitekturo in oblikovanje,

New Heroes

Piran – Hall Monfort

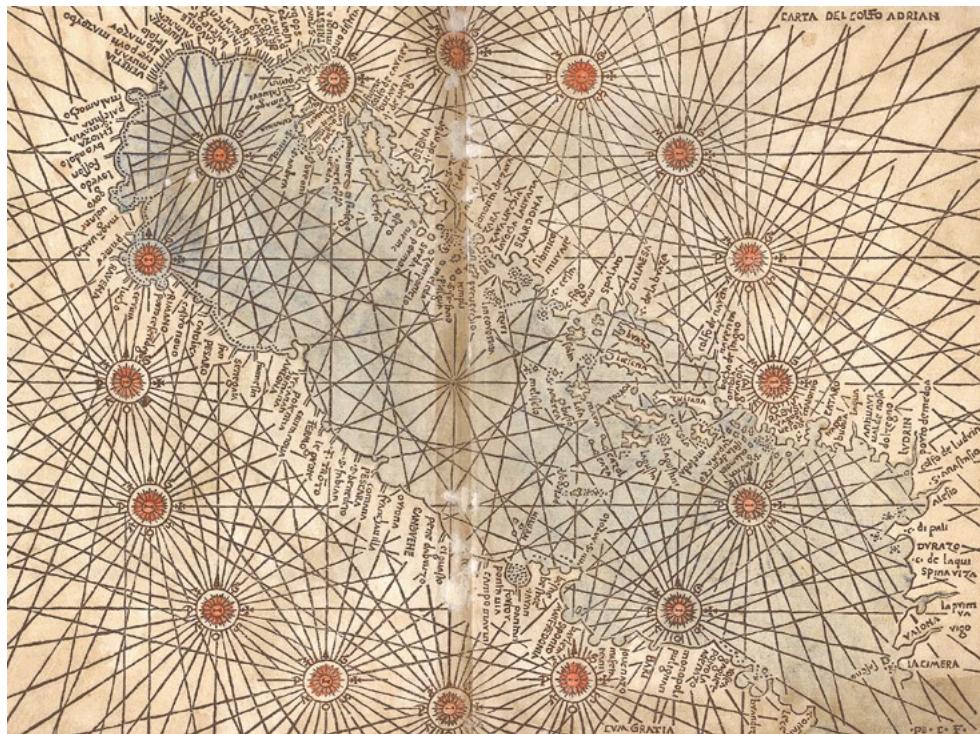

The generic figure of the hero is inextricably linked to his (or her) endeavours. Mostly, these endeavours involve displacements: epic journeys that start from beloved places, along with symbols of identity, honour, and homeland, and convey the hero into unexplored lands, often hostile and desolate, populated by the unknown.

In terms of the global issues that humanity has confronted in recent years, the classic hero might now be seen in the figure of the migrant. But if the traditional protocol of literature requires closing the circle of the journey with the homecoming of the hero, enriched by past conquests and current reunions with loved ones, today the journey has the appearance of a straight line, leading from one point to another, often with no real home left to return to. This transition has created a physical space of displacement, a theme to which the industrial designer Odo Fioravanti and sea kayaker Marin Medak were asked to respond.

Starting with the stark fact that since 2015 the number of migrants reaching EU shores has reached almost two millions, the *New Heroes* team confronted the complex subject of migration in the current political climate, focusing especially on the European context and the Mediterranean Sea. What could the approach of industrial design, which is based on perpetual economic exchange, possibly contribute to a subject as delicate as this one? The designer wanted to expose the inability of his discipline to make a real difference in this issue without active involvement of international politics and economic planning, and so the project focused on the idea of heroes and the tools heroes use for survival. If lances and shields, spears and bows defined the heroes of Greek and Latin mythology, what physical objects would future generations inherit as testament to the bravery of migrants?

Pietro Coppo, zemljevid Jadranskega morja, 16. stoletje,
fotografija Dušan Podgornik, Pomorski muzej Sergej Mašera Piran

Pietro Coppo, map of the Adriatic sea, 16th century,
photo by Dušan Podgornik, Sergej Mašera Maritime Museum Piran

predstavlja zbirko petih simbolnih predmetov, ki prikazujejo prepričanje, da predmeti lahko izražajo misli in zavedanje. Te »sulice« niso funkcionalni predmeti, kljub temu pa so zasnovane kot industrijski izdelki, pripravljeni za množično proizvodnjo. Sporočilo projekta se skriva v ročni izdelavi predmetov: izdelal jih je oblikovalce sam, z namenom, da se približa tej tematiki s pomočjo svojega najboljšega orodja – oblikovalske prakse.

Poleg simbolnih orodij v MAO je v Portorožu, na skladišču soli Monfort nasproti morja, postavljena tudi instalacija z naslovom *This is a Poor/Rich State* ki se nanaša na kontroverzno izjavo migrantke med prečkanjem slovensko-hrvaške meje. Tema instalacije je dojemljeno migracijskih procesov in njihove kompleksne dinamike s strani prebivalstva in medijev.

Embracing the symbolic level dictated by the conviction that objects can convey thoughts and awareness, the project, entitled *Æphaestus* and exhibited in MAO, presents a collection of five symbolic objects. The five "spears" are not functional objects, but are rather designed to look like industrial products, the results of mass production. The concealed statement of the project consists of its hand-made production, which was executed by Fioravanti himself in order to get closer to the theme by using the designer's optimal tool: namely, design practise.

In addition to the symbolic objects, *This is a Poor/Rich State* is an installation at the Monfort warehouse in Portorož facing out towards the sea. It refers to the controversial statement made by a migrant crossing the Slovenian border and addresses the responses of people and the media to the migration process and its complex dynamics.

SUNDAYS AT BIO 25

28. 5. / 11. 6. / 25. 6. / 9. 7. / 20. 8. /
3. 9. / 17. 9. / 1. 10. / 15. 10. / 29. 10.

Guided Tours and Children's Workshops

→ 11.00

For ten Sundays, the Museum of Architecture and Design will offer guided tours of the exhibition *Faraway, So Close* and host creative workshops for children. Guided tours provide a detailed insight into the working process of individual groups, in the thinking of the authors, curators and other experts and creators of this year's Biennale. Creative workshops are a place of fun, game, creativity, meeting and socializing for children. The guided tour of the exhibition will be followed by a visit to Mayor's Cave near Grosuplje and a tour of the *Underground Release* installation.

→ 13.00

Bus transport: museum parking lot to Mayor's Cave, with expected return to the museum at 16.30.

Entrance fee to Mayor's Cave with a 15% discount for *Faraway, So Close* exhibition visitors: 7 € for adults, 5 € for schoolchildren

Sunday workshops and guided tours in MAO are free of charge!

RUŠENJE ZIDOV – zaključni festival platforme Future Architecture

20.–30. 9. 2017

Muzej za arhitekturo in oblikovanje

Prihajajoča generacija najbolj talentiranih arhitektov in načrtovalcev ruši zidove: tako zgrajene, kot namišljene, strokovne in ideološke. Zanje arhitektura ni nujno dejavnost, katere namen je zgolj graditi, temveč prej polje intelektualnega raziskovanja. Ideje, ki so jih v preteklih dveh letih predstavili v okviru platforme Future Architecture, odražajo kritičnost in odločenost soočiti se z največjimi problemi časa, v katerem živimo.

Arhitektura je zanje način mišljjenja, opazovanja, analiziranja in spremenjanja sveta, v katerem delujejo. Na zaključnem festivalu platforme Future Architecture se bodo zbrali evropski arhitekti, oblikovalci, umetniki in kustosi z najprodornejšimi idejami za prihodnost. V okviru festivala bodo potekale filmske projekcije, razstave, konference, delavnice in pogovori. Festival bo s serijo predavanj, ki bodo predstavila nove raziskave o pomenu arhitekture Jožeta Plečnika za prihodnost, obeležil tudi Plečnikovo leto.

BREAKING DOWN THE WALLS: Closing Festival of the Future Architecture Platform

20.–30. 9. 2017

Museum of Architecture and Design

The emerging generation of the most talented architects and urban planners is breaking down walls: not only built walls, but also imaginary, professional, and ideological walls. For them, architecture is not necessarily an activity whose sole purpose is construction, but rather a field for intellectual research. Their ideas presented in the Future Architecture platform over the course of the past two years reflect their critical approach and determination to address the most pressing problems of our times. For them, architecture is a way of thinking, seeing, analysing, and changing the world we work in. The Future Architecture Closing Festival will bring together Europe's architects, designers, creative individuals, and curators with their most powerful ideas for the future. There will be film screenings, exhibitions, conferences, workshops, and discussions. A series of lectures presenting new research on the importance of Jože Plečnik's architecture for the future will be held to mark Plečnik Year.

Praktične informacije

Practical Information

Kako do lokacij instalacij iz smeri Ljubljane

SPROSTITEV PODZEMLJA

Županova jama
Cerovo 9, Grosuplje

KOORDINATE

45.913245, 14.638001

KAKO DO TJA

Z avtomobilom: Ljubljana–Grosuplje. Iz centra Grosuplja sledite oznakam do Županove jame. V smeri proti Turjaku se peljite skozi Ponovo vas in Št. Jurij. Pri tabli zavijte levo proti Županovi jami.

Oddaljenost od Ljubljane: 27 km

Vodeni ogledi

Sobote, nedelje in prazniki ob 15.00
Za skupinske oglede (min. 5 oseb) po dogovoru:
041 407 705 ali info@zupanovajama.si

Vstopnina

Individualno: odrasli: 8 €, šolski otroci: 6 €
Skupine nad 20 obiskovalcev: odrasli: 7 €, otroci: 5 €
Za predšolske otroke v spremstvu staršev je obisk brezplačen.

ZAVZETJE GOZDOV

Rožni studenec - Kočevje

KOORDINATE

45.647309, 14.838981

KAKO DO TJA

Z avtomobilom: Ljubljana–Kočevje. Pred vstopom v Kočevje na prvem krožišču zavijte v prvo ulico desno (sledite smerokazom za Mahovnik), na drugem krožišču pri gostilni Tri zvezde spet desno, na koncu ulice nato zavijte levo in skozi naselje peljite do Rinže; prečkajte most čez Rinžo in nadaljujte pot v gozd ter nato naravnost do prvega večjega razcepja. Na desni sta parkirišče in tabla za učno pot Rožni studenec.

Oddaljenost od Ljubljane: 60 km

How to Get to the Installation Locations from Ljubljana

UNDERGROUND RELEASE

Mayor's Cave
Cerovo 9, Grosuplje

COORDINATES

45.913245, 14.638001

HOW TO ARRIVE

By car: Ljubljana–Grosuplje. Once in the centre of Grosuplje, follow the signs for Županova jama. Drive through Ponova vas and Št. Jurij towards Turjak. At the sign for Županova jama turn left towards the cave.

Distance from Ljubljana: 27 km

Guided tours

Saturdays, Sundays & public holidays at 15.00
For custom tours (groups larger than five adults)
please call: +386 41 407 705 or info@zupanovajama.si

Admissions

Adults 8 €, school children 6 €
Groups of 20 visitors or more: adults 7 €, children 5 €
Children before school age can enter free of charge

OCCUPYING WOODS

Rožni studenec - Kočevje

COORDINATES

45.647309, 14.838981

HOW TO ARRIVE

By car: Ljubljana–Kočevje. At the first roundabout, before entering Kočevje, take the first exit right (follow the signs for Mahovnik). At the second roundabout, next to the Tri zvezde restaurant, take the right exit again, drive to the end of the street, turn left, and drive through the village to the Rinža river. Drive across the bridge and into the forest towards the first major crossroads. On your right there is a parking lot and a signboard for the Rožni studenec Nature Trail.

Distance from Ljubljana: 60 km

PO UTOPIJI

Paviljon ob Delavskem domu Trbovlje
Ulica 1. junija 16, Trbovlje

KOORDINATE

46.150227, 15.043491

KAKO DO TJA

Z avtomobilom: Ljubljana–Trbovlje. Delavski dom stoji v središču mesta.

Oddaljenost od Ljubljane: 60 km

ČISTO NOVO SOBIVANJE

Muzej za arhitekturo in oblikovanje
Pot na Fužine 2, Ljubljana

KOORDINATE

46.050594, 14.563469

KAKO DO TJA

Z avtomobilom: MAO domuje na gradu Fužine, ki stoji ob Ljubljanici v jugovzhodnem delu Ljubljane. Iz centra Ljubljane peljite po Zaloški cesti in pred obvoznico zavijte desno na Chengdujsko cesto. Pred Fužinskim mostom parkirajte na parkirišču.

Oddaljenost iz centra Ljubljane: 6 km

NOV ZAGON PODEŽELJA

Supermarket v Genterovcih
Pri Čardi 14, Dobrovnik

KOORDINATE

46.616407, 16.403186

KAKO DO TJA

Z avtomobilom: Ljubljana–Lendava. Na avtocesti pred Lendavo zavijte na izvoz Turnišče. V prvem krožnem križišču zavijte desno, v drugem nadaljujte pot naravnost, v tretjem pa zavijte desno. Čez približno 6 km pridete do vasi Genterovci, supermarket je ob krožnem križišču.

Oddaljenost od Ljubljane: 200 km

AFTER UTOPIA

Pavillion next to the Workers Cultural Centre Trbovlje
Ulica 1. junija 16, Trbovlje

COORDINATES

46.150227, 15.043491

HOW TO ARRIVE

By car: Ljubljana–Trbovlje. The Workers Cultural Centre is in the centre of town.

Distance from Ljubljana: 60 km

BRAND NEW COEXISTENCE

Museum of Architecture and Design
Pot na Fužine 2, Ljubljana

COORDINATES

46.050594, 14.563469

HOW TO ARRIVE

By car: MAO is in Fužine castle, next to the Ljubljanica River in southeast Ljubljana. From the centre of Ljubljana, take Zaloška cesta road, and at the last crossroads before the freeway turn right onto Chengdujska cesta road. Turn right before the Fužine Bridge and park in the parking lot.

Distance from the centre of Ljubljana: 6 km

COUNTRYSIDE RELOADED

Supermarket in Genterovci
Pri Čardi 14, Dobrovnik

COORDINATES

46.616407, 16.403186

HOW TO ARRIVE

By car: Ljubljana–Lendava. At the highway before Lendava, take the exit marked Turnišče. At the first roundabout, take the right exit, continue straight at the second roundabout, and take another right exit at the third roundabout. Drive for about 6 km to Genterovci; the supermarket is next to the roundabout.

Distance from Ljubljana: 200 km

PROŽNOST PRETEKLOSTI

Lokacija bo objavljena naknadno.

RESILIENCE OF THE PAST

Location to be announced.

NEW HEROES

Monfort
Obala 8, Portorož

COORDINATES
45.514741, 13.580414

HOW TO ARRIVE

By car: Ljubljana–Portorož. The Hall Monfort is located along the coastal road between Portorož and Bernardin.

Distance from Ljubljana: 120 km

Bežigrad
